The Services

The "Services" means (each and altogether):

the provision of information and blogs on a range of topics (the "Info Services");

the ability to purchase Plutons as part of the token sale organised by Block Code and described in detail via the following link <https://getplutons.plutus.it> (the "Plutons Crowd Sale"); and

the ability to purchase goods and services using Bitcoin through a web-based application currently still in development, which will be made available on the Website ("Plutus").

The Parties agree, that Block Code will further develop these Terms and Conditions to include provisions that govern your use of Plutus (in addition to the provisions already contained herein), before the launch of Plutus.

The Plutons Crowd Sale

Important Disclaimer: Pluton tokens do not represent or constitute an equity ownership stake, share, or equivalent in ANY public or private company, corporation, or other entity in any jurisdiction; Pluton tokens are only for use in connection with the terms of Pluton token smart contract code and do not entitle any holder of Pluton tokens to any additional rights with respect to Blockcode Limited ("Blockcode", "Plutus.it", or "we") or any other corporation, company, or entity in any jurisdiction.

By obtaining Pluton tokens (also referred to as "PLU tokens" or simply "PLU") through your interaction with the Pluton crowdsale website you expressly agree to all of the terms and conditions set forth in these terms. If you do not understand or do not agree to those terms, you should not create Pluton (PLU) tokens. Further, you represent to us that you are lawfully able to enter into contracts (e.g., you are not a minor). If you are entering into this Agreement for an entity, such as the company you work for, you represent to us that you have legal authority to bind that entity.

Terms of Sale

Participants can purchase Plutons directly from <https://getplutons.plutus.it>.

The Pluton tokens are created on the Ethereum blockchain with a token smart contract

code and participants will receive Pluton tokens, a decentralised digital token, by sending either Bitcoins (“**BTC**”) or Ether (“**ETH**”) to the address displayed on the website.

All transactions and participations will be timestamped on the blockchain for the issuance of the Pluton tokens, as well as the bonus which is to be included during the first three (3) days only.

The Pluton token will be issued directly to the user’s Ethereum wallet by Plutus.it using the token contract code once the Pluton crowdsale ends.

Participants using BTC for participation in crowdsale will need to provide a valid Ethereum wallet (NOT an exchange wallet) in order to receive their Plutons. Plutus.it will not hold any responsibility if an incorrect address is provided on the Get Plutons crowdsale web page. This address can be changed on the web page or by sending a request to Plutus.it, which may require additional verification.

Participants using ETH for participation in the crowdsale will receive Pluton(s) directly to the Ethereum wallet used to obtain Plutons from the crowdsale. The transaction will be saved in a wallet smart contract and cannot be changed. Hence, please ensure to only use your own Ethereum wallet and not an exchange (otherwise the exchange or the third party will receive your Pluton(s)) and Plutus.it will not be responsible for any losses due to user error. This payout address cannot be changed automatically.

The funds raised by the Pluton crowdsale will be secured to finance the Plutus.it project. In return, Plutus.it will provide a free service to Pluton Crowdsale participants who hold Plutons, enabling them to use Plutons to make NFC payments on the Plutus app in the same manner as bitcoins or ether, with the added benefit of instant conversions and zero fees.

The release of funds allocated for the Plutus.it project from the multi-signature smart contract and Bitgo wallets are released by requiring $\frac{3}{5}$ of the account signatories (keys) once each milestone has been successfully reached.

All wallets are secured by 5 members of the board, with each securing a key to access the funds. (Please see these minutes)

There are conditions set for the release of funds to the Plutus.it development team and are locked in the Pluton crowdsale multi-signature wallets, the last two of which will be assessed will be as follows:

Condition 1: Once the crowdsale ends (30th June 2016), 40%

of the funds raised will be released to the Plutus.it project. The funds will be required to continue immediate development of the Plutus.it infrastructure.

Condition 2: Up to Seven (7) days after the launch of the PlutusDEX, 10% of the funds raised will be released to Plutus.it.

Condition 3: Up to Seven (7) days after the launch of the Plutus Mobile App, the remaining 50% of the funds raised will be released to Plutus.it.

Bitcoin:

A multi-signature address will be provided by Bitgo and Ethereum Smart Contracts to manage the funds, and $\frac{3}{5}$ keys will be needed to access the funds.

Ether:

A multi-signature Ethereum Smart Contracts account is created on the Ethereum blockchain to secure and manage the funds, and $\frac{3}{5}$ keys will be needed to access the funds.

Note: Details of multi-signature wallet and verifiable public addresses will be available on a separate post with a excel sheet containing details of the Board members .

There is no refund of your cryptocurrency deposit from the crowdsale multi-signature wallet or the Ethereum smart contract. The total amount raised is calculated to determine the final value of Pluton at the sale end. These funds are locked in until after the sale and cannot be accessed by Plutus.it or the multi-sig holders until milestone are reached as according to the Plutus.it purchase agreement.

Some information or data may not appear correctly due to timestamp and lag in API connection. However, the bonus and sale process will always be verified on the blockchain before Plutons are distributed to the users.

The sale may end early with a 24hrs of notice.

There will be a sale cap of BTC and ETH equivalent of 15,000 BTC.

Plutus.it does not guarantee price or valuation of the Pluton tokens. Their value is determined by the users during the sale and similar to any other product or digital token their value may fluctuate depending on the market demand. Please understand that there is a risk involved and you must do your own due diligence.

Bonus

A bonus is automatically awarded to users at the end of the crowdsale. The bonus stage lasts only during the first three days of the sale. Starting from 3%, 2%, 1%.

The bonus is timestamped according to the transaction and this will be calculated at the sale end.

Crowdsale Governance and Road Map

The sale starts on on Tuesday 21st June 2016 and will last for 9 days only.

A total of 20,000,000 Pluton tokens are created (Pluton source code).

4.25% (850,000) PLU will be sold in an initial public offering. The bonus stage will only last during the first 3 days.

95.75% Plutons will be held in a multisig smart contract only to be accessible by the PlutusDEX contract. Plutus.it does **NOT** own these tokens. The Plutus Board will secure the remaining Plutons until the DEX is developed and deployed with the rebate system.

Bitcoin and Ether raised from the 4.25% PLU crowdsale will also be stored in a multi sig wallet and smart contract.

The Plutus Board will have an overview of these accounts, each holding a key to the multi-sig token contract.

Multi-sig smart contract access will be secured between 5 members of the Plutus Board. $\frac{3}{5}$ members of the board will require to approve the deployment of the PlutusDEX and rebate contract. (Excel sheet with multi sig keys associated with these accounts will be published on Plutus blog posts)

The board controls the release of funds from three 'wallets': Bitcoin, Ether and Pluton.

Release of Funds and Deployment

The Board will release the 850,000 Plutons to the participants of the crowdsale. Transaction signature will be visible and verifiable on the blockchain

The Board will release 40% of BTC and/or Ether for development and operational structure.

The PlutusDEX will be launched and the Board will transfer all of the remaining 19,915,000 Plutons (PLU) from the multi-sig smart contract rebate pool to the PlutusDEX rebate system smart contract.

The Board will release 10% of BTC/Ether for further development of the Plutus App, platform.

The Plutus App will be launched and the rebate system on the PlutusDEX will begin to emit Plutons to the app users as well as enable Pluton conversions on the app at no fee.

The Board will release 50% of BTC/Ether to the Plutus development team for further development and expansion of the Plutus payment system on to other services.

All the transactions above will be recorded on the blockchain. We will in this case take complete responsibility in securing and appropriate management of the funds raised. Trusting humans who's primary interest is to protect the ecosystem instead of a unproven code is currently the best way to insure the longevity of Plutus.it and it's supporters. The supervisory board will also publish their minutes to public channels as well as a hash of the document containing may also be stored on the blockchain.
